(RC, Rapid Communication)

SUBJECT INDEX

Achilles' tendon
The effect of immobilization on the recovery of rabbit soleus muscle from tenotomy: modulation by chronic electrical stimulation. **79**, 515, 1994
Acid–base
Acid–base transport systems in a polarized human intestinal cell monolayer: Caco-2. **79**, 723, 1994
Acidosis
The effect of lowered pH on the Ca^{2+}-activated contractile characteristics of skeletal muscle fibres from endurance-trained rats. **79**, 47, 1994
Adenosine
Differentiation of the peripherally mediated from the centrally mediated influences of adenosine in the rat during systemic hypoxia. **79**, 809, 1994
Adenosine triphosphate (ATP)
A linear relationship between ATP degradation and fatigue during high-intensity dynamic exercise in rat skeletal muscle. **79**, 865, 1994
Adrenalectomy
Interaction of aldosterone and oxytocin to influence renal sodium excretion in rats. **79**, 763, 1994
Afferent nerve fibre
Ethanol augments the baroreflex-inhibitory effects of sciatic nerve stimulation in the anaesthetized dog. **79**, 81, 1994
Primary and secondary afferent discharges from the same spindle during chain fibre contraction in cat tenuissimus muscle. **79**, 691, 1994
Amino acid
Blood amino acids in the pregnant mare and fetus: the effects of maternal fasting and intrafetal insulin. **79**, 423, 1994
Amino acid transport
The effect of a hyposmotic shock on amino acid efflux from lactating rat mammary tissue: stimulation of taurine and glycine efflux via a pathway distinct from anion exchange and volume-activated anion channels. **79**, 797, 1994
Amniotic fluid
Role of fetal sac fluids during maternal water deprivation in sheep. **79**, 147, 1994
Axon
The contribution of ischaemia and deformation to the conduction block generated by compression of the cat sciatic nerve. **79**, 583, 1994
Baroreceptor reflex
Ethanol augments the baroreflex-inhibitory effects of sciatic nerve stimulation in the anaesthetized dog. **79**, 81, 1994
Bile secretion
Effect of intestinal resection, type of dietary fat and time on biliary lipid secretion in rats. **79**, 25, 1994
Blood flow
Role of prostaglandins in regulation of blood flow and modulation of sympathetic vasoconstriction in normal and acutely inflamed rabbit knee joints. **79**, 93, 1994
Increased mammary blood flow in the lactating goat induced by parathyroid hormone-related protein. **79**, 565, 1994
Bone
The effect of high phosphorus intake on calcium and phosphorus retention and bone turnover in growing lambs. **79**, 175, 1994
Estimation of intracellular calcium activity in confluent monolayers of primary cultures of quail medullary bone osteoclasts. **79**, 975, 1994
Bone resorption
Dimensional analysis of osteoclastic bone resorption and the measurement of biologically active calcitonin. **79**, 387, 1994
Book Reviews
Textbook of Endocrine Physiology, 2nd edn edited by James E. Griffin and Sergio R. Ojeda. **79**, 111, 1994
The Logic of Life edited by C.A.R. Boyd and D. Noble. **79**, 277, 1994
Neurobiology of Invertebrates: Signal Molecules, Networks and Behaviour edited by J. Salánki, K.S.-Rózsa and K. Elekes. **79**, 278, 1994
Women Physiologists edited by Lynn Bindman, Alison Brading and Tilli Tansey. **79**, 279, 1994
Life Before Birth and a Time To Be Born by Peter W. Nathanielsz. **79**, 279, 1994
Vision: Coding and Efficiency edited by Colin Blakemore. **79**, 605, 1994
Biofluid Mechanics by Jagan N. Mazumdar. **79**, 869, 1994
Animal Experimentation and the Future of Medical Research edited by J.H. Botting. **79**, 869, 1994
An Introduction to Bioceramics edited by Larry L. Hench and June Wilson. **79**, 870, 1994
Spatial Vision edited by Laurence Harris and Michael Jenkin. **79**, 870, 1994
Models in Biology: Mathematics, Statistics and Computing by D. Brown and P. Rothery. **79**, 871, 1994
The Physiology of the Human Placenta by Kenneth Page. **79**, 872, 1994
Limb Development and Regeneration – Parts A and B edited by John F. Fallon, Paul F. Goetinck, Robert O. Kelley and David L. Stocum. **79**, 1021, 1994
Physiology by Numbers (An Encouragement to Quantitative Thinking) by Richard F. Burton. **79**, 1021, 1994
Temperature Regulation in Laboratory Rodents by Christopher J. Gordon. **79**, 1022, 1994
Corticotropin-Releasing Factor, CIBA Foundation Symposium 172 edited by Derek J. Chadwick, Joan Marsh and Kate Ackrill. **79**, 1023, 1994
Introduction to Neurobiology by Heinrich Reichert. **79**, 1024, 1994
Fetus and Neonate: Physiology and Clinical Applications edited by Mark A. Hanson, John A.D. Spencer and Charles H. Rodeck. **79**, 1025, 1994

Fundamentals of Hearing, 3rd edn by William A. Yost. **79**, 1026, 1994
Cellular and Molecular Biology of Bone edited by Masaki Noda. **79**, 1026, 1994

Brain
Expression of c-*fos* in the ovine brain following different types of stress, or central administration of corticotrophin-releasing hormone. **79**, 241, 1994

Brattleboro rat
The effect of chronic sodium depletion on renal function in conscious rats. **79**, 161, 1994

Bronchus
Evidence for preservation of epithelial function in cryopreserved porcine and human bronchi. **79**, 409, 1994

Caco-2
Acid–base transport systems in a polarized human intestinal cell monolayer: Caco-2. **79**, 723, 1994

Caffeine
The effect of ryanodine on the contraction of isolated frog atrial trabeculae is triggered by caffeine. **79**, 435, 1994

Calcitonin
Dimensional analysis of osteoclastic bone resorption and the measurement of biologically active calcitonin. **79**, 387, 1994

Calcium
The effect of high phosphorus intake on calcium and phosphorus retention and bone turnover in growing lambs. **79**, 175, 1994
Calcium store depletion in dimethyl BAPTA-loaded human platelets increases protein tyrosine phosphorylation in the absence of a rise in cytosolic calcium. **79**, 269, 1994
The role of parathyroid hormone-related protein in calcium homeostasis in the fetal pig. **79**, 527, 1994
Estimation of intracellular calcium activity in confluent monolayers of primary cultures of quail medullary bone osteoclasts. **79**, 975, 1994

Calcium current
Effects of intracellular pH on calcium currents and intracellular calcium ions in the smooth muscle of rabbit portal vein. **79**, 669, 1994
Calcium currents and contraction in frog atrial trabeculae. **79**, 839, 1994

Cardiac muscle
The role of the sarcoplasmic reticulum in the response of isolated ferret cardiac muscle to β-adrenergic stimulation. **79**, 929, 1994

Cardiac myocyte
Reduction in the contraction and intracellular calcium transient of single rat ventricular myocytes by gadolinium and the attenuation of these effects by extracellular NaH_2PO_4. **79**, 107, 1994

Catecholamine
The role of the sarcoplasmic reticulum in the response of isolated ferret cardiac muscle to β-adrenergic stimulation. **79**, 929, 1994

Cell volume
Effects of hyposmotic shock on taurine transport in isolated trout hepatocytes. **79**, 983, 1994

Cerebellar granule
A novel method for recording whole-cell and single-channel currents from differentiating cerebellar granule cells *in situ*. **79**, 495, 1994

Cerebral blood velocity
The effect of high concentrations of inspired oxygen on middle cerebral artery blood velocity measured by transcranial Doppler. **79**, 593, 1994

Cerebral cortex
The intracortical neuronal connectivity subserving focal epileptiform activity in rat neocortex. **79**, 705, 1994

Chloride transport
A new approach to measuring transepithelial potentials in the bovine lens reveals a chloride-dependent component. **79**, 741, 1994

Cholecystokinin
Local *versus* peripheral blood administration of cholecystokinin-8 and secretin on pancreatic secretion in calves. **79**, 301, 1994

Cochlea
The G.L. Brown Prize Lecture. The cellular machinery of the cochlea. **79**, 113, 1994

Competition
Spatial *versus* consumptive competition at polyneuronally innervated neuromuscular junctions. **79**, 465, 1994

Conduction block
The relationship between ischaemic conduction failure and conduction velocity in cat myelinated axons. **79**, 571, 1994

Contraction
Blockade of intrafusal neuromuscular junctions of cat muscle spindles with gallamine. **79**, 365, 1994
Calcium currents and contraction in frog atrial trabeculae. **79**, 839, 1994

Corpus striatum
Catecholamine overflow within rat striatum: the influence of microstimulation and electroconvulsive stimulation as observed with voltammetry. **79**, 327, 1994

Cotransport
Modulation of K^+–Cl^- cotransport in equine red blood cells. **79**, 997, 1994

Coughing
Defensive reflexes of the respiratory system in anaesthetized rabbits during high frequency jet ventilation. **79**, 967, 1994

Cryopreservation
Evidence for preservation of epithelial function in cryopreserved porcine and human bronchi. **79**, 409, 1994

Cyanate
High affinity of blood for oxygen reduces oxygen uptake in contracting canine gracilis muscle. **79**, 71, 1994

Cyclic adenosine monophosphate (cyclic AMP)
The role of cyclic AMP in the control of sugar transport across the brush-border and basolateral membranes of rat jejunal enterocytes. **79**, 203, 1994

Cytosolic calcium
Calcium influx and release in isolated rat osteoclasts. **79**, 537, 1994

Dehydration
The struggle to maintain hydration and osmoregulation in animals experiencing severe dehydration and rapid rehydration: the story of ruminants. **79**, 281, 1994
Development
Post-crucial period effects of visual experience and deprivation on the guinea-pig superior collicular map of auditory space. **79**, 313, 1994
Diaphragm
The effects of oesophageal distension on diaphragm and laryngeal muscle activity in the anaesthetized cat. **79**, 505, 1994
Diet
Indirect measurement of saliva secretion in sheep fed diets of different structures and the effect of such diets on ruminal fluid kinetics and fermentation pattern. **79**, 823, 1994
Dietary deprivation
Fluid hypersecretion induced by enterotoxin STa in nutritionally deprived rats: jejunal and ileal dynamics *in vivo*. **79**, 547, 1994
Eccentric contraction
An explanation for residual increased tension in striated muscle after stretch during contraction. **79**, 831, 1994
Efferent duct
Micropuncture and cannulation studies of fluid composition and transport in the ductuli efferentes testis of the rat: comparisons with the homologous metanephric proximal tubule. **79**, 915, 1994
Electrical stimulation
Excitation of soleus/gastrocnemius γ-motoneurones by group II knee joint afferents is suppressed by group IV joint afferents in the decerebrate, spinalized cat. **79**, 357, 1994
Electroconvulsive stimulation
Catecholamine overflow within rat striatum: the influence of microstimulation and electroconvulsive stimulation as observed with voltammetry. **79**, 327, 1994
Endothelium-derived relaxing factor (EDRF)
The relationship between blood flow and diameter in the iliac artery of the anaesthetized dog: the role of endothelium-derived relaxing factor and shear stress. **79**, 635, 1994
Enterotoxin
Fluid hypersecretion induced by enterotoxin STa in nutritionally deprived rats: jejunal and ileal dynamics *in vivo*. **79**, 547, 1994
Epididymis
Micropuncture and cannulation studies of fluid composition and transport in the ductuli efferentes testis of the rat: comparisons with the homologous metanephric proximal tubule. **79**, 915, 1994
Epilepsy
The intracortical neuronal connectivity subserving focal epileptiform activity in rat neocortex. **79**, 705, 1994
Epithelium
The regulation of membrane $^{125}I^-$ and $^{86}Rb^+$ permeability in a virally transformed cell line (NCL-SG3) derived from the human sweat gland epithelium. **79**, 445, 1994
A new approach to measuring transepithelial potentials in the bovine lens reveals a chloride-dependent component. **79**, 741, 1994
Epithelium-derived inhibitory factor
Evidence for preservation of epithelial function in cryopreserved porcine and human bronchi. **79**, 409, 1994
Ethanol
Ethanol augments the baroreflex-inhibitory effects of sciatic nerve stimulation in the anaesthetized dog. **79**, 81, 1994
The effect of alcohol on physiological tremor. **79**, 273, 1994
Evoked potential
The intracortical neuronal connectivity subserving focal epileptiform activity in rat neocortex. **79**, 705, 1994
Exercise
The effect of lowered pH on the Ca^{2+}-activated contractile characteristics of skeletal muscle fibres from endurance-trained rats. **79**, 47, 1994
Exercise training
Effect of hypoxia on arterial potassium concentration at rest and during exercise in man. **79**, 257, 1994
Fasting
Blood amino acids in the pregnant mare and fetus: the effects of maternal fasting and intrafetal insulin. **79**, 423, 1994
Fat
Effect of intestinal resection, type of dietary fat and time on biliary lipid secretion in rats. **79**, 25, 1994
Fatigue
Contractile properties of rat gastrocnemius muscle during staircase, fatigue and recovery. **79**, 59, 1994
A linear relationship between ATP degradation and fatigue during high-intensity dynamic exercise in rat skeletal muscle. **79**, 865, 1994
Fatty acid
Sodium and chloride transport across the rumen epithelium of cattle *in vitro*: effect of short-chain fatty acids and amiloride. **79**, 755, 1994
Fetus
Effect of hyperthermia on uterine and umbilical blood flows in pregnant sheep. **79**, 1, 1994
Secretion of acid, gastrin, and cobalamin-binding proteins by the fetal pig stomach: developmental regulation by cortisol. **79**, 135, 1994
Role of fetal sac fluids during maternal water deprivation in sheep. **79**, 147, 1994
The role of parathyroid hormone-related protein in calcium homeostasis in the fetal pig. **79**, 527, 1994
Fibroblast
Mechanosensitive fibroblasts in the sino-atrial node region of rat heart: interaction with cardiomyocytes and possible role. **79**, 943, 1994
Fluid exchange
Hyaluronan reduces fluid escape rate from rabbit knee joints disparately from its effect on fluidity. **79**, 103, 1994

Force–velocity relation
Rectangular hyperbola fitted to muscle force–velocity data using three-dimensional regression analysis. **79**, 235, 1994
Frog heart
The effect of ryanodine on the contraction of isolated frog atrial trabeculae is triggered by caffeine. **79**, 435, 1994
Calcium currents and contraction in frog atrial trabeculae. **79**, 839, 1994
Frusemide
The effect of frusemide on oxytocin-induced contractions of the rat myometrium. **79**, 661, 1994
Fusimotor fibre
Primary and secondary afferent discharges from the same spindle during chain fibre contraction in cat tenuissimus muscle. **79**, 691, 1994
Fusimotor neurone
Blockade of intrafusal neuromuscular junctions of cat muscle spindles with gallamine. **79**, 365, 1994
Fusimotor stimulation
The use of sinusoidal and ramp stretch stimuli in characterizing fusimotor effects on cat muscle spindles. **79**, 337, 1994
Gadolinium
Reduction in the contraction and intracellular calcium transient of single rat ventricular myocytes by gadolinium and the attenuation of these effects by extracellular NaH_2PO_4. **79**, 107, 1994
Effects of gadolinium on length-dependent force in guinea-pig papillary muscle. **79**, 249, 1994
Gastric secretion
Secretion of acid, gastrin, and cobalamin-binding proteins by the fetal pig stomach: developmental regulation by cortisol. **79**, 135, 1994
Glucocorticoid
Secretion of acid, gastrin, and cobalamin-binding proteins by the fetal pig stomach: developmental regulation by cortisol. **79**, 135, 1994
Glucose metabolism
Glucose and L-lactate metabolism in pregnant and in lactating ewes fed barley- or ground maize-based diets. **79**, 35, 1994
Glutamate
Electrical stimulation of the vagus increases extracellular glutamate recovered from the nucleus tractus solitarii of the cat by *in vivo* microdialysis. **79**, 265, 1994
Haemoglobin
High affinity of blood for oxygen reduces oxygen uptake in contracting canine gracilis muscle. **79**, 71, 1994
Haemorrhage
Haemodynamic responses to hypotensive haemorrhage in conscious sheep with emphasis on renal and femoral blood flow. **79**, 957, 1994
Hair cell
The G.L. Brown Prize Lecture. The cellular machinery of the cochlea. **79**, 113, 1994
Hearing
The G.L. Brown Prize Lecture. The cellular machinery of the cochlea. **79**, 113, 1994
Plasticity in the superior collicular auditory space map of adult guinea-pigs. **79**, 319, 1994
Hepatocyte
Effects of hyposmotic shock on taurine transport in isolated trout hepatocytes. **79**, 983, 1994
High frequency jet ventilation
Defensive reflexes of the respiratory system in anaesthetized rabbits during high frequency jet ventilation. **79**, 967, 1994
Histamine
The G.W. Harris Prize Lecture. The gut endocrine system and its control. **79**, 607, 1994
Homeostasis
The struggle to maintain hydration and osmoregulation in animals experiencing severe dehydration and rapid rehydration: the story of ruminants. **79**, 281, 1994
Hyaluronan
Hyaluronan reduces fluid escape rate from rabbit knee joints disparately from its effect on fluidity. **79**, 103, 1994
5-Hydroxytryptamine
Evidence for downregulation of hypothalamic 5-hydroxytryptamine receptor function in endurance-trained athletes. **79**, 461, 1994
Hypertension
A faster twitch contraction of soleus in the spontaneously hypertensive rat is partly due to changed fibre type composition. **79**, 377, 1994
Hyperthermia
Effect of hyperthermia on uterine and umbilical blood flows in pregnant sheep. **79**, 1, 1994
Hypotension
Haemodynamic responses to hypotensive haemorrhage in conscious sheep with emphasis on renal and femoral blood flow. **79**, 957, 1994
Hypoxia
Effect of hypoxia on arterial potassium concentration at rest and during exercise in man. **79**, 257, 1994
Hypoxia activates a potassium current in isolated smooth muscle cells from large pulmonary arteries of the rabbit. **79**, 597, 1994
Differentiation of the peripherally mediated from the centrally mediated influences of adenosine in the rat during systemic hypoxia. **79**, 809, 1994
Insulin
Blood amino acids in the pregnant mare and fetus: the effects of maternal fasting and intrafetal insulin. **79**, 423, 1994
Intestinal absorption
Carrier-mediated transport is involved in mucosal succinate uptake by rat large intestine. **79**, 215, 1994
Intestinal development
Differential effects of lipid and carbohydrate on enterocyte lactase activity in newborn piglets. **79**, 189, 1994
Intestinal secretion
Fluid hypersecretion induced by enterotoxin STa in nutritionally deprived rats: jejunal and ileal dynamics *in vivo*. **79**, 547, 1994

Intestine
Effect of intestinal resection, type of dietary fat and time on biliary lipid secretion in rats. **79**, 25, 1994

Intracellular calcium
Effects of intracellular pH on calcium currents and intracellular calcium ions in the smooth muscle of rabbit portal vein. **79**, 669, 1994

Intracellular calcium transient
Reduction in the contraction and intracellular calcium transient of single rat ventricular myocytes by gadolinium and the attenuation of these effects by extracellular NaH_2PO_4. **79**, 107, 1994

Intracellular pH
Effects of intracellular pH on calcium currents and intracellular calcium ions in the smooth muscle of rabbit portal vein. **79**, 669, 1994
Acid–base transport systems in a polarized human intestinal cell monolayer: Caco-2. **79**, 723, 1994

Intrafusal muscle fibre
The use of sinusoidal and ramp stretch stimuli in characterizing fusimotor effects on cat muscle spindles. **79**, 337, 1994

Ionomycin
Calcium influx and release in isolated rat osteoclasts. **79**, 537, 1994

Ischaemia
The relationship between ischaemic conduction failure and conduction velocity in cat myelinated axons. **79**, 571, 1994

Jejunum
The role of cyclic AMP in the control of sugar transport across the brush-border and basolateral membranes of rat jejunal enterocytes. **79**, 203, 1994
The effect of rapid changes in plasma sugar concentration on the brush-border potential difference in rat jejunum. **79**, 415, 1994

Joint
Role of prostaglandins in regulation of blood flow and modulation of sympathetic vasoconstriction in normal and acutely inflamed rabbit knee joints. **79**, 93, 1994

Joint afferent
Excitation of soleus/gastrocnemius γ-motoneurones by group II knee joint afferents is suppressed by group IV joint afferents in the decerebrate, spinalized cat. **79**, 357, 1994

Lactate metabolism
Glucose and L-lactate metabolism in pregnant and in lactating ewes fed barley- or ground maize-based diets. **79**, 35, 1994

Lactation
Increased mammary blood flow in the lactating goat induced by parathyroid hormone-related protein. **79**, 565, 1994

Laminin
Laminin mediates the restitution of rat gastric mucosa *in vitro*. **79**, 647, 1994

Large intestine
Carrier-mediated transport is involved in mucosal succinate uptake by rat large intestine. **79**, 215, 1994

Larynx
The effects of oesophageal distension on diaphragm and laryngeal muscle activity in the anaesthetized cat. **79**, 505, 1994

Laser
Effects of low intensity infrared laser irradiation upon conduction in the human median nerve *in vivo*. **79**, 227, 1994

Lens
A new approach to measuring transepithelial potentials in the bovine lens reveals a chloride-dependent component. **79**, 741, 1994

Mammary gland
Inhibitory effect of milk fat on milk secretion in the mouse: a re-examination. **79**, 561, 1994
Increased mammary blood flow in the lactating goat induced by parathyroid hormone-related protein. **79**, 565, 1994

Mammary tissue
The effect of a hyposmotic shock on amino acid efflux from lactating rat mammary tissue: stimulation of taurine and glycine efflux via a pathway distinct from anion exchange and volume-activated anion channels. **79**, 797, 1994

Mechano-electrical coupling
Mechanosensitive fibroblasts in the sino-atrial node region of rat heart: interaction with cardiomyocytes and possible role. **79**, 943, 1994

Medullary bone
Effect of raised extracellular calcium on cell spread area in quail medullary bone osteoclasts. **79**, 15, 1994

Membrane permeability
The regulation of membrane $^{125}I^-$ and $^{86}Rb^+$ permeability in a virally transformed cell line (NCL-SG3) derived from the human sweat gland epithelium. **79**, 445, 1994

Microdialysis
Electrical stimulation of the vagus increases extracellular glutamate recovered from the nucleus tractus solitarii of the cat by *in vivo* microdialysis. **79**, 265, 1994

Microstimulation
Catecholamine overflow within rat striatum: the influence of microstimulation and electroconvulsive stimulation as observed with voltammetry. **79**, 327, 1994

Milk fat
Inhibitory effect of milk fat on milk secretion in the mouse: a re-examination. **79**, 561, 1994

Milk secretion
Inhibitory effect of milk fat on milk secretion in the mouse: a re-examination. **79**, 561, 1994

Mineral absorption
Effects of parathyroid hormone and parathyroid hormone-related protein on the rates of absorption of magnesium, calcium, sodium, potassium and phosphate ions from the reticulorumen of sheep. **79**, 401, 1994

Motoneurone
Excitation of soleus/gastrocnemius γ-motoneurones by group II knee joint afferents is suppressed by group IV joint afferents in the decerebrate, spinalized cat. **79**, 357, 1994

Mucosa
Laminin mediates the restitution of rat gastric mucosa *in vitro*. **79**, 647, 1994
Muscle
Effects of gadolinium on length-dependent force in guinea-pig papillary muscle. **79**, 249, 1994
The effect of immobilization on the recovery of rabbit soleus muscle from tenotomy: modulation by chronic electrical stimulation. **79**, 515, 1994
Developmental and gestational changes of phosphoethanolamine and taurine in rat brain, striated and smooth muscle. **79**, 681, 1994
A linear relationship between ATP degradation and fatigue during high-intensity dynamic exercise in rat skeletal muscle. **79**, 865, 1994
Muscle contraction
Contractile properties of rat gastrocnemius muscle during staircase, fatigue and recovery. **79**, 59, 1994
A faster twitch contraction of soleus in the spontaneously hypertensive rat is partly due to changed fibre type composition. **79**, 377, 1994
Muscle mechanics
An explanation for residual increased tension in striated muscle after stretch during contraction. **79**, 831, 1994
Muscle spindle
The use of sinusoidal and ramp stretch stimuli in characterizing fusimotor effects on cat muscle spindles. **79**, 337, 1994
Blockade of intrafusal neuromuscular junctions of cat muscle spindles with gallamine. **79**, 365, 1994
Primary and secondary afferent discharges from the same spindle during chain fibre contraction in cat tenuissimus muscle. **79**, 691, 1994
Muscle stretch
An explanation for residual increased tension in striated muscle after stretch during contraction. **79**, 831, 1994
Myometrium
The effect of frusemide on oxytocin-induced contractions of the rat myometrium. **79**, 661, 1994
Natriuresis
Interaction of aldosterone and oxytocin to influence renal sodium excretion in rats. **79**, 763, 1994
Neonate
Differential effects of lipid and carbohydrate on enterocyte lactase activity in newborn piglets. **79**, 189, 1994
Assessment of thermoregulatory and postprandial thermogenesis over the first 24 hours after birth in pigs. **79**, 1011, 1994
Nerve compression
The contribution of ischaemia and deformation to the conduction block generated by compression of the cat sciatic nerve. **79**, 583, 1994
Nerve conduction
Effects of low intensity infrared laser irradiation upon conduction in the human median nerve *in vivo*. **79**, 227, 1994
Nerve fibre
The relationship between ischaemic conduction failure and conduction velocity in cat myelinated axons. **79**, 571, 1994
The contribution of ischaemia and deformation to the conduction block generated by compression of the cat sciatic nerve. **79**, 583, 1994
***N*-ethyl maleimide (NEM)**
Activation of the vasopressin-sensitive water permeability pathway in the toad bladder by *N*-ethyl maleimide. **79**, 775, 1994
Neuroendocrine challenge
Evidence for downregulation of hypothalamic 5-hydroxytryptamine receptor function in endurance-trained athletes. **79**, 461, 1994
Neuromuscular junction
Spatial *versus* consumptive competition at polyneuronally innervated neuromuscular junctions. **79**, 465, 1994
Neuropeptide Y
Presynaptic inhibition by neuropeptide Y of slow inhibitory synaptic transmission in submucous neurones of guinea-pig caecum. **79**, 261, 1994
Nitric oxide
Modulation of blood flow and tissue perfusion by endothelium-derived relaxing factor. **79**, 873, 1994
Nucleotide receptor
The regulation of membrane $^{125}I^-$ and $^{86}Rb^+$ permeability in a virally transformed cell line (NCL-SG3) derived from the human sweat gland epithelium. **79**, 445, 1994
Nucleus tractus solitarii
Electrical stimulation of the vagus increases extracellular glutamate recovered from the nucleus tractus solitarii of the cat by *in vivo* microdialysis. **79**, 265, 1994
Nutrition
Differential effects of lipid and carbohydrate on enterocyte lactase activity in newborn piglets. **79**, 189, 1994
Oesophagus
The effects of oesophageal distension on diaphragm and laryngeal muscle activity in the anaesthetized cat. **79**, 505, 1994
Osteocalcin
Effects of low phosphate intake on bone and mineral metabolism and microbial protein synthesis in lambs. **79**, 183, 1994
Osteoclast
Effect of raised extracellular calcium on cell spread area in quail medullary bone osteoclasts. **79**, 15, 1994
Dimensional analysis of osteoclastic bone resorption and the measurement of biologically active calcitonin. **79**, 387, 1994
Calcium influx and release in isolated rat osteoclasts. **79**, 537, 1994
Estimation of intracellular calcium activity in confluent monolayers of primary cultures of quail medullary bone osteoclasts. **79**, 975, 1994
Oxygen
The effect of high concentrations of inspired oxygen on middle cerebral artery blood velocity measured by transcranial Doppler. **79**, 593, 1994

Oxygen consumption
High affinity of blood for oxygen reduces oxygen uptake in contracting canine gracilis muscle. **79**, 71, 1994

Oxytocin
The effect of frusemide on oxytocin-induced contractions of the rat myometrium. **79**, 661, 1994

Pancreas
Interaction between secretin and nerve-mediated amylase secretion in the isolated exocrine rat pancreas. **79**, 851, 1994

Pancreatic secretion
Local *versus* peripheral blood administration of cholecystokinin-8 and secretin on pancreatic secretion in calves. **79**, 301, 1994

Parathyroid hormone
Effects of parathyroid hormone and parathyroid hormone-related protein on the rates of absorption of magnesium, calcium, sodium, potassium and phosphate ions from the reticulo-rumen of sheep. **79**, 401, 1994

Parathyroid hormone-related protein
The role of parathyroid hormone-related protein in calcium homeostasis in the fetal pig. **79**, 527, 1994

Patch clamp
A novel method for recording whole-cell and single-channel currents from differentiating cerebellar granule cells *in situ*. **79**, 495, 1994

Permeability
Activation of the vasopressin-sensitive water permeability pathway in the toad bladder by *N*-ethyl maleimide. **79**, 775, 1994

Phosphoethanolamine
Changes in human and rat uterine phosphoethanolamine and taurine with pregnancy and parturition. **79**, 601, 1994
Developmental and gestational changes of phosphoethanolamine and taurine in rat brain, striated and smooth muscle. **79**, 681, 1994

Phosphorus
The effect of high phosphorus intake on calcium and phosphorus retention and bone turnover in growing lambs. **79**, 175, 1994
Effects of low phosphate intake on bone and mineral metabolism and microbial protein synthesis in lambs. **79**, 183, 1994

Photobiology
Effects of low intensity infrared laser irradiation upon conduction in the human median nerve *in vivo*. **79**, 227, 1994

Physiological tremor
The effect of alcohol on physiological tremor. **79**, 273, 1994

Pig
Assessment of thermoregulatory and postprandial thermogenesis over the first 24 hours after birth in pigs. **79**, 1011, 1994

Plasma sugar concentration
The effect of rapid changes in plasma sugar concentration on the brush-border potential difference in rat jejunum. **79**, 415, 1994

Plasticity
Post-crucial period effects of visual experience and deprivation on the guinea-pig superior collicular map of auditory space. **79**, 313, 1994
Plasticity in the superior collicular auditory space map of adult guinea-pigs. **79**, 319, 1994

Platelet
Calcium store depletion in dimethyl BAPTA-loaded human platelets increases protein tyrosine phosphorylation in the absence of a rise in cytosolic calcium. **79**, 269, 1994

Potassium
Effect of hypoxia on arterial potassium concentration at rest and during exercise in man. **79**, 257, 1994

Potassium flux
Modulation of K^+–Cl^- cotransport in equine red blood cells. **79**, 997, 1994

Potential difference
The effect of rapid changes in plasma sugar concentration on the brush-border potential difference in rat jejunum. **79**, 415, 1994

Potentiation
Contractile properties of rat gastrocnemius muscle during staircase, fatigue and recovery. **79**, 59, 1994

Prize Lectures
The G.L. Brown Prize Lecture. The cellular machinery of the cochlea. **79**, 113, 1994
The G.W. Harris Prize Lecture. The gut endocrine system and its control. **79**, 607, 1994

Prostaglandin
Role of prostaglandins in regulation of blood flow and modulation of sympathetic vasoconstriction in normal and acutely inflamed rabbit knee joints. **79**, 93, 1994

Proximal convoluted tubule
The effect of chronic sodium depletion on renal function in conscious rats. **79**, 161, 1994

Pulmonary artery
Hypoxia activates a potassium current in isolated smooth muscle cells from large pulmonary arteries of the rabbit. **79**, 597, 1994

Quail
Effect of raised extracellular calcium on cell spread area in quail medullary bone osteoclasts. **79**, 15, 1994

Recovery
The effect of immobilization on the recovery of rabbit soleus muscle from tenotomy: modulation by chronic electrical stimulation. **79**, 515, 1994

Red blood cell
Modulation of K^+–Cl^- cotransport in equine red blood cells. **79**, 997, 1994

Renal blood flow
Haemodynamic responses to hypotensive haemorrhage in conscious sheep with emphasis on renal and femoral blood flow. **79**, 957, 1994

Restitution
Laminin mediates the restitution of rat gastric mucosa *in vitro*. **79**, 647, 1994

Review Articles
The struggle to maintain hydration and osmo-

regulation in animals experiencing severe dehydration and rapid rehydration: the story of ruminants. **79**, 281, 1994
Spatial *versus* consumptive competition at polyneuronally innervated neuromuscular junctions. **79**, 465, 1994
Modulation of blood flow and tissue perfusion by endothelium-derived relaxing factor. **79**, 873, 1994

Rumen
Effects of parathyroid hormone and parathyroid hormone-related protein on the rates of absorption of magnesium, calcium, sodium, potassium and phosphate ions from the reticulorumen of sheep. **79**, 401, 1994
Sodium and chloride transport across the rumen epithelium of cattle *in vitro*: effect of short-chain fatty acids and amiloride. **79**, 755, 1994
Indirect measurement of saliva secretion in sheep fed diets of different structures and the effect of such diets on ruminal fluid kinetics and fermentation pattern. **79**, 823, 1994

Ruminant
The struggle to maintain hydration and osmoregulation in animals experiencing severe dehydration and rapid rehydration: the story of ruminants. **79**, 281, 1994

Ryanodine
The effect of ryanodine on the contraction of isolated frog atrial trabeculae is triggered by caffeine. **79**, 435, 1994

Saliva
Indirect measurement of saliva secretion in sheep fed diets of different structures and the effect of such diets on ruminal fluid kinetics and fermentation pattern. **79**, 823, 1994

Sarcoplasmic reticulum
The role of the sarcoplasmic reticulum in the response of isolated ferret cardiac muscle to β-adrenergic stimulation. **79**, 929, 1994

Secretin
Local *versus* peripheral blood administration of cholecystokinin-8 and secretin on pancreatic secretion in calves. **79**, 301, 1994
Interaction between secretin and nerve-mediated amylase secretion in the isolated exocrine rat pancreas. **79**, 851, 1994

Shear stress
The relationship between blood flow and diameter in the iliac artery of the anaesthetized dog: the role of endothelium-derived relaxing factor and shear stress. **79**, 635, 1994
Modulation of blood flow and tissue perfusion by endothelium-derived relaxing factor. **79**, 873, 1994

Sheep
Glucose and L-lactate metabolism in pregnant and in lactating ewes fed barley- or ground maize-based diets. **79**, 35, 1994
Effects of low phosphate intake on bone and mineral metabolism and microbial protein synthesis in lambs. **79**, 183, 1994
Expression of c-*fos* in the ovine brain following different types of stress, or central administration of corticotrophin-releasing hormone. **79**, 241, 1994

Sino-atrial node
Mechanosensitive fibroblasts in the sino-atrial node region of rat heart: interaction with cardiomyocytes and possible role. **79**, 943, 1994

Skeletal muscle
Rectangular hyperbola fitted to muscle force–velocity data using three-dimensional regression analysis. **79**, 235, 1994
A faster twitch contraction of soleus in the spontaneously hypertensive rat is partly due to changed fibre type composition. **79**, 377, 1994

Skinned fibre
The effect of lowered pH on the Ca^{2+}-activated contractile characteristics of skeletal muscle fibres from endurance-trained rats. **79**, 47, 1994

Slow inhibitory postsynaptic potential
Presynaptic inhibition by neuropeptide Y of slow inhibitory synaptic transmission in submucous neurones of guinea-pig caecum. **79**, 261, 1994

Smooth muscle
Hypoxia activates a potassium current in isolated smooth muscle cells from large pulmonary arteries of the rabbit. **79**, 597, 1994

Sneezing
Defensive reflexes of the respiratory system in anaesthetized rabbits during high frequency jet ventilation. **79**, 967, 1994

Sodium–chloride transport
Sodium and chloride transport across the rumen epithelium of cattle *in vitro*: effect of short-chain fatty acids and amiloride. **79**, 755, 1994

Sodium deprivation
The effect of chronic sodium depletion on renal function in conscious rats. **79**, 161, 1994

Stomach gastrin
The G.W. Harris Prize Lecture. The gut endocrine system and its control. **79**, 607, 1994

Stress
Expression of c-*fos* in the ovine brain following different types of stress, or central administration of corticotrophin-releasing hormone. **79**, 241, 1994

Stretch-activated channel
Effects of gadolinium on length-dependent force in guinea-pig papillary muscle. **79**, 249, 1994

Submucous neurone
Presynaptic inhibition by neuropeptide Y of slow inhibitory synaptic transmission in submucous neurones of guinea-pig caecum. **79**, 261, 1994

Succinate
Carrier-mediated transport is involved in mucosal succinate uptake by rat large intestine. **79**, 215, 1994

Sugar transport
The role of cyclic AMP in the control of sugar transport across the brush-border and basolateral membranes of rat jejunal enterocytes. **79**, 203, 1994

Superior colliculus
Post-crucial period effects of visual experience and

deprivation on the guinea-pig superior collicular map of auditory space. **79**, 313, 1994
Plasticity in the superior collicular auditory space map of adult guinea-pigs. **79**, 319, 1994

Synapse
Spatial *versus* consumptive competition at polyneuronally innervated neuromuscular junctions. **79**, 465, 1994

Synovial interstitium
Hyaluronan reduces fluid escape rate from rabbit knee joints disparately from its effect on fluidity. **79**, 103, 1994

Taurine
Changes in human and rat uterine phosphoethanolamine and taurine with pregnancy and parturition. **79**, 601, 1994
Developmental and gestational changes of phosphoethanolamine and taurine in rat brain, striated and smooth muscle. **79**, 681, 1994
Effects of hyposmotic shock on taurine transport in isolated trout hepatocytes. **79**, 983, 1994

Thermogenesis
Assessment of thermoregulatory and postprandial thermogenesis over the first 24 hours after birth in pigs. **79**, 1011, 1994

Tissue print
A novel method for recording whole-cell and single-channel currents from differentiating cerebellar granule cells *in situ*. **79**, 495, 1994

Training
Evidence for downregulation of hypothalamic 5-hydroxytryptamine receptor function in endurance-trained athletes. **79**, 461, 1994

Transport
Micropuncture and cannulation studies of fluid composition and transport in the ductuli efferentes testis of the rat: comparisons with the homologous metanephric proximal tubule. **79**, 915, 1994

Tyrosine phosphorylation
Calcium store depletion in dimethyl BAPTA-loaded human platelets increases protein tyrosine phosphorylation in the absence of a rise in cytosolic calcium. **79**, 269, 1994

Urine flow
Interaction of aldosterone and oxytocin to influence renal sodium excretion in rats. **79**, 763, 1994

Uterus
Effect of hyperthermia on uterine and umbilical blood flows in pregnant sheep. **79**, 1, 1994
Changes in human and rat uterine phosphoethanolamine and taurine with pregnancy and parturition. **79**, 601, 1994

Vagus nerve
Interaction between secretin and nerve-mediated amylase secretion in the isolated exocrine rat pancreas. **79**, 851, 1994

Vascular smooth muscle
Modulation of blood flow and tissue perfusion by endothelium-derived relaxing factor. **79**, 873, 1994

Vasodilatation
The relationship between blood flow and diameter in the iliac artery of the anaesthetized dog: the role of endothelium-derived relaxing factor and shear stress. **79**, 635, 1994
Differentiation of the peripherally mediated from the centrally mediated influences of adenosine in the rat during systemic hypoxia. **79**, 809, 1994

Vasopressin
Activation of the vasopressin-sensitive water permeability pathway in the toad bladder by *N*-ethyl maleimide. **79**, 775, 1994

Volume regulation
The effect of a hyposmotic shock on amino acid efflux from lactating rat mammary tissue: stimulation of taurine and glycine efflux via a pathway distinct from anion exchange and volume-activated anion channels. **79**, 797, 1994

Water deprivation
Role of fetal sac fluids during maternal water deprivation in sheep. **79**, 147, 1994
